

Sergey Kudelin

Growth Engineer / Miami, FL

kudelin.dev@gmail.com / sergeykudelin.com / linkedin.com/in/sergeykudelin / github.com/Seryozh

Growth Engineer who turns market research and customer conversations into working product experiments. Currently contracting with Fyxed after building FutureClinic Creators and its physician-acquisition systems.

EXPERIENCE

Growth Engineer / Fyxed

Contract / Jun 2026 to present

Fintech for residential property managers.

- Build and operate a source-backed market intelligence system that reads property-management websites for payment signals and links each qualified account to a verified decision-maker.
- Turn repeated repair-funding signals from customer calls into a PM-branded owner workflow, including private intake and case review for a live repair.
- Build and run the data and orchestration behind Fyxed's outbound motion, which produced the company's first outbound-booked meeting and shifted warm outreach toward text after email underperformed.

GTM Engineer / FutureClinic, YC F24

Contract / Mar to May 2026

Digital clinics and creator tools for physicians.

- Built the first working version of FutureClinic Creators myself, including its backend and AI pipeline, then worked with another engineer to take it into production. It is live today.
- Built Doctor Preview Pages and the internal review and publishing workflow behind them, giving each physician creator a custom clinic page and founder video made specifically for them.
- Built Nikola, an AI outreach agent in Slack that researched physician creators and created personalized Gmail drafts only after human approval.

SKILLS

Engineering TypeScript, Python, SQL, React, Next.js, FastAPI, Postgres, Supabase, Redis

AI systems Claude Agent SDK, OpenRouter, tool calling, human approval, state machines, audit logs

Growth systems Market research, enrichment, source verification, CRM design, campaign orchestration

Creator systems Audience research, idea selection, scripting workflows, thumbnail direction, voice modeling

CREATOR BACKGROUND

Built and ran a Roblox YouTube channel before entering startups. That work trained my instincts for audience research, idea selection, scripts, thumbnails, and keeping content specific to the creator.

EDUCATION

Computer Science / Florida International University

Miami, FL
