

## Opening question

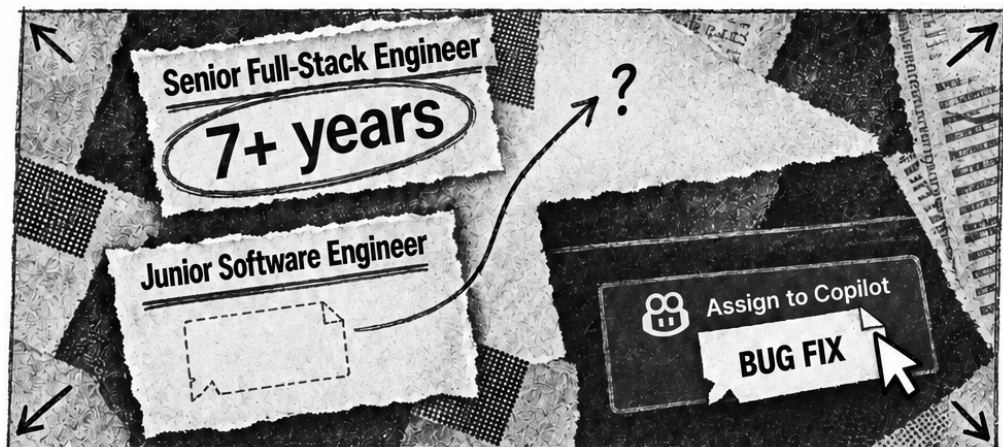

If AI takes

the work

we give junior developers,

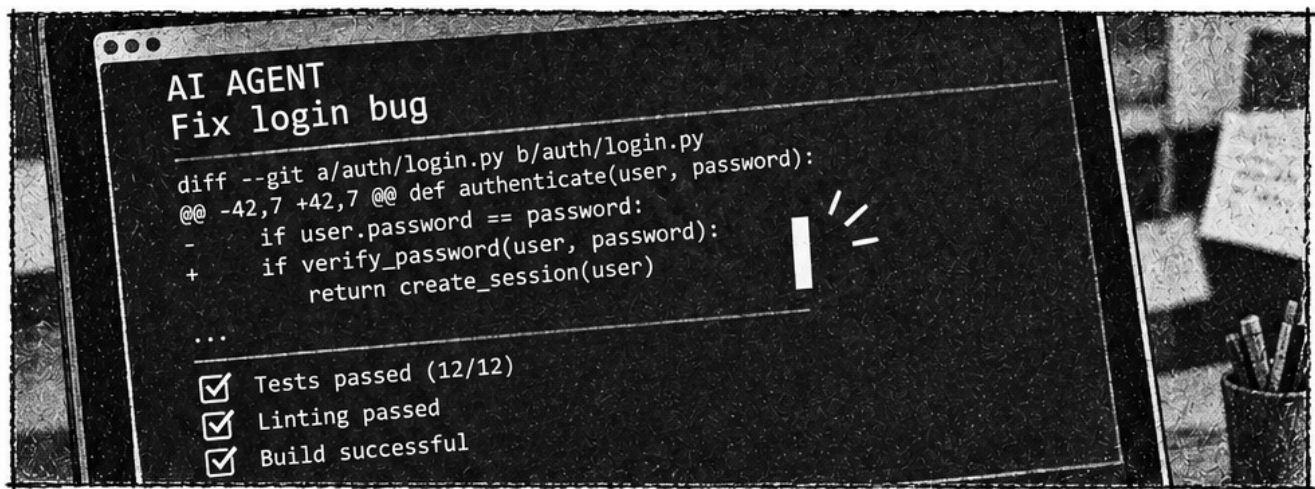

where are the next senior developers  
supposed to come from?

## The company's decision

Imagine you run a software company.

Your senior developer can now hand bug fixes to AI.

# One less salary

**HIRING BUDGET**

Current team [REDACTED]

Junior developer (PLANNED) [REDACTED]

Projected payroll [REDACTED] [Hatched bar]

A mouse cursor points to the 'Junior developer (PLANNED)' field, with a dashed line connecting it to the 'Projected payroll' bar.

If that works,

**HIRING BUDGET**

Current team [REDACTED]

Junior developer (PLANNED) [REDACTED]

Projected payroll [REDACTED] [Hatched bar]

A button labeled 'Remove planned hire' with a trash icon is positioned over the 'Junior developer (PLANNED)' field. A mouse cursor points to the button, and a dashed line connects it to the 'Projected payroll' bar.

why pay

**HIRING BUDGET**

Current team [REDACTED]

[Empty dashed box]

Projected payroll [REDACTED] [Hatched bar]

An arrow points from the 'Projected payroll' bar to the empty dashed box above it.

another salary?

# The final question

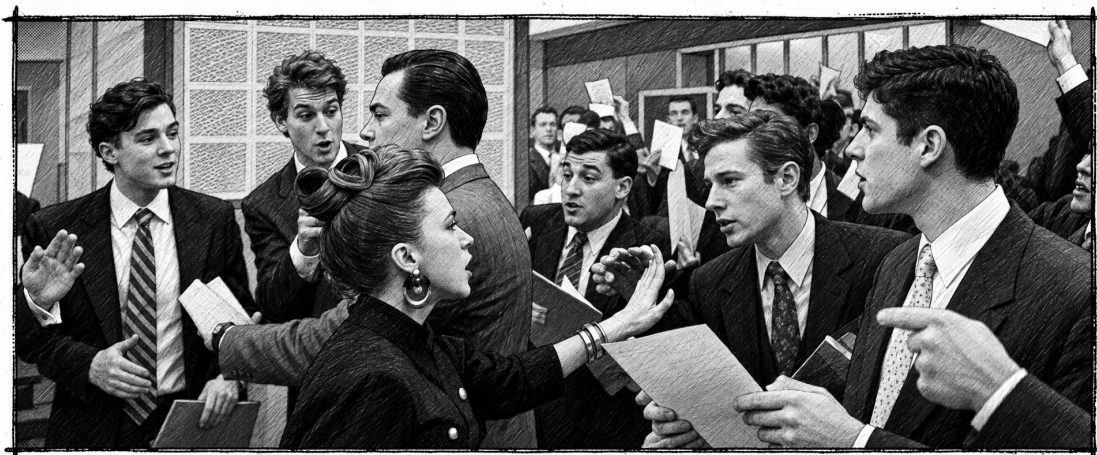

INTERVIEW CLIP

"I think we could have this very unusual combination of very fast GDP growth and high unemployment, or at least underemployment."

Dario Amodei, CEO of Anthropic

FILM CLIP: THE WOLF OF WALL STREET

And if he's right,  
how do you get your first job?
