

Sergey Kudelin

Growth Engineer / Miami, FL

kudelin.dev@gmail.com / sergeykudelin.com / linkedin.com/in/sergeykudelin / github.com/Seryozh

I build products and the GTM systems around them for early-stage teams. Currently contracting with Fyxed after working directly with FutureClinic's founder.

EXPERIENCE

Growth Engineer / Fyxed

Contract / Jun 2026 to present

Fintech for residential property managers.

- Build a source-backed market intelligence system that reads property-manager websites for payment signals and traces each useful account to a verified decision-maker.
- Turn repeated repair-funding signals from customer calls into a PM-branded owner workflow, with the product surface and case tooling needed to test the idea safely.
- Built the operating layer behind Fyxed's early outbound motion, which produced the company's first outbound-booked meeting and moved warm outreach toward text after email underperformed.

GTM Engineer / FutureClinic, YC F24

Contract / Mar to May 2026

Digital clinics and creator tools for physicians.

- Built the first working version of FutureClinic Creators, including the backend and AI pipeline, then worked with another engineer to take it into production. The product is live today.
- Built personalized Doctor Preview Pages and the internal review and publishing workflow behind them, including individualized founder-video generation for physician creators.
- Built Nikola, a human-approved AI agent that researched doctors and prepared personalized Gmail drafts while keeping every outbound action behind review.

SKILLS

Engineering TypeScript, Python, SQL, React, Next.js, FastAPI, Postgres, Supabase, Redis

AI systems Claude Agent SDK, OpenRouter, tool calling, human approval, state machines, audit logs

Growth systems Enrichment, source verification, CRM design, campaign orchestration, deliverability

EDUCATION

Computer Science / Florida International University

Miami, FL
