

Sergey Kudelin

Growth Engineer / Miami, FL

sergey@sergeykudelin.com / sergeykudelin.com / linkedin.com/in/sergeykudelin / github.com/Seryozh

I build working systems around market evidence. I joined FutureClinic after building a physician-discovery engine for the company before I had the job, then built the original FutureClinic Creators implementation. Now I am the Growth Engineer at Fyxed, where I build the data and product workflows behind GTM.

EXPERIENCE

Growth Engineer / Fyxed

Contract / Jun 2026 to present

Fintech for residential property managers.

- Built and now operate Fyxed's source-backed GTM data engine across roughly 3,600 property-management companies and 5,200 contacts, linking payment signals to verified decision-makers.
- Turned repeated repair-funding signals from customer calls into a PM-branded owner payment choice, then built the private intake and case-review workflow for the product test.
- Built and now run Fyxed's outbound system, including CRM architecture, enrichment, sequencing, and channel testing.

GTM Engineer / FutureClinic, YC F24

Contract / Mar to May 2026

Digital clinics and creator tools for physicians.

- Built the original end-to-end FutureClinic Creators implementation, including its backend and AI pipeline. The product is live today.
- Built Derm Hunter as proof of work before joining FutureClinic. A documented run discovered 245 YouTube channels and verified 68 physicians against NPI data in 14 minutes.
- Built a personalized physician-acquisition workflow that generated a custom clinic preview and founder video for each prospect. Nikola handled prospect research in Slack and created Gmail drafts only after human approval.

SKILLS & TOOLS

Languages & web	TypeScript, JavaScript, Python, SQL, HTML/CSS, React, Next.js, Node.js, FastAPI, Express
Data & infra	Postgres, Supabase, Redis, Drizzle, BullMQ, Modal, Vercel, GitHub, REST APIs, webhooks
AI & agents	Claude, Codex, Claude Agent SDK, OpenRouter, Gemini, GPT-4o, LangGraph, human approval
GTM & research	Clay, Apollo, Exa Agent API, Firecrawl, Apify, Hunter, Snov, NPI Registry, YouTube Data API
CRM & outbound	Twenty CRM, Instantly, Smartlead, Airtable, Slack, Gmail, Resend, Twilio Lookup, OpenPhone, Google Drive

MISC FACTS ABOUT ME

Creator	Grew a Roblox YouTube channel to 200,000 subscribers.
AI systems	I have a deep practical understanding of orchestrating AI systems around real tasks and finding where they remove the most manual work. Recently, I turned a broken-screen MacBook into a remote agent host over SSH.
