

Sergey Kudelin

Founding / AI / Forward-Deployed Engineer · Miami, FL

sergey@sergeykudelin.com · sergeykudelin.com · github.com/Seryozh · linkedin.com/in/sergeykudelin

I build AI products end to end. Most recently the GTM engineer at **FutureClinic (Y Combinator F24)**, where I built the company's growth engine: the production AI systems that find, verify, and win doctors, and the autonomous agents (like Nikola) that ran the outreach. It capped three years of building with AI, from tools for video games to **Lux**, an autonomous coding agent shipped to my 200K-subscriber YouTube channel (2,500+ installs).

EXPERIENCE

GTM Engineer (Contract) · **FutureClinic** · **Y Combinator F24**

Mar – May 2026 · Remote, Miami

FutureClinic lets any doctor launch a chat-based digital clinic: AI takes the patient history and drafts each case, the doctor reviews and signs. I built the company's GTM engine end to end, directly with the founder.

- **FC Outreach** ↗ (<https://sergeykudelin.com/outreach-showcase>) Discovery across YouTube and Instagram, license verification against the federal NPI registry, then a personalized landing page ([dr_mamina](https://futureclinic.app/dr_mamina) (https://futureclinic.app/dr_mamina)) and founder video for every doctor, rendered with Whisper word-level alignment + ffmpeg chroma-key. Run by Nikola, an autonomous agent on Modal (Claude Agent SDK, filesystem-as-brain).
- **FC Creators** ↗ (<https://sergeykudelin.com/creators-showcase>) 6-stage content pipeline (Topics → Titles → Thumbnail → Questions → Script → Export) that learns a doctor's voice and drafts ready-to-record videos, human-in-the-loop throughout. Next.js + Supabase + Docker workers, orchestrating Claude Opus + Sonnet, FAL, Supadata, Apify.

"Phenomenal work, the kind of product I was genuinely excited to use myself. I recommend Sergey without reservation."

Dr. Usama Syed · Founder, FutureClinic (YC F24) · usama@futureclinic.com · [Full letter](#) ↗

Marketing & SEO · **Gray & Sons**

Summer 2025 · Miami

Helped build sellusyourjewelry.com, the company's high-end watch buying site, and ran AI-assisted SEO content and lead workflows. My first production AI work at a real business.

PROJECTS

Derm Hunter ↗ (<https://futureclinic-growth.vercel.app>) AI doctor-discovery pipeline, built solo in two nights to apply to FutureClinic. They hired me to ship it as a production system.

Lux ↗ (<https://github.com/Seryozh/lux-agent-ai>) Autonomous coding agent for Roblox, shipped through my 200K-subscriber YouTube channel (@SergeCode (<https://youtube.com/@SergeCode>)) to 2,500+ installs. Cut token cost per request roughly 90% with lazy context loading.

LogiScan ↗ (<https://package-scanner-gules.vercel.app>) Phone-camera + Gemini pallet auditor with pixel-perfect bounding boxes. Turned a 90-minute nightly audit into about 10, at roughly \$0.002 a scan.

EDUCATION

Computer Science · Florida International University

TOOLS

Claude Code · Modal · Supabase · Firebase · Vercel · Next.js · FastAPI · Apify · ScrapFly · ScrapeCreators · Apollo · Airtable · Gemini · FAL · Whisper · Playwright
